EDUCATION

Sreenidhi Institute of Science and Technology

Bachelor of Technology in Electronics and Computer Engineering — CGPA: 8.5

Hyderabad, Telangana

Nov 2022 – May 2026

EXPERIENCE

AI Research Intern

Alpes AI

April 2025 – August 2025

Hyderabad, India

- Built an end-to-end RAG pipeline over 2,000+ legal documents covering ingestion, OpenAI embedding generation, vector indexing, and ranked retrieval.
- Contributed similarity scoring logic to a video frame analysis pipeline, improved accuracy by 12%.

PROJECTS

LeetCode Assistant | *React.js, Flask, MongoDB, JWT Auth, Docker*

[live](#)

- Engineered a data ingestion layer wrapping LeetCode's GraphQL API to extract, normalize, and store structured data into MongoDB.
- Built aggregation, REST APIs to surface MNC-specific question patterns and progress.
- Deployed and self-hosted the application on a Linux VM, managing the server setup and application runtime.

Pulse: Video Management Platform | *Node.js, Express, MongoDB, Socket.IO, FFmpeg*

[live](#)

- Built a 5-stage asynchronous video moderation pipeline that extracts frames, transcribes audio, performs NSFW/profanity analysis, and automatically classifies uploaded content
- Integrated FFmpeg and Hugging Face models with timeout handling, retry-safe API calls, and stage-level failure isolation to prevent processing bottlenecks
- Implemented organization-scoped RBAC using JWT authentication and delivered real-time processing updates through WebSocket-based event broadcasting

Multi Agent Collaborative System | *Python, LangGraph, PostgreSQL*

[link](#)

- Orchestrated multi-agent communication using LangGraph's stateful graph architecture, enabling parallel task execution and reducing evaluation latency
- Designed relational schema and persisted agent state history to PostgreSQL with concurrency-safe writes.
- Developed and submitted a patch for [Hive](#) to prevent startup crashes caused by malformed LLM token configurations.

SKILLS

AI/ML: RAG, LLM Orchestration, LangChain, LangGraph, FAISS, Semantic Search, Pydantic

Languages: Python, C++, SQL

Web Development: FastAPI, React.js, Flask, GraphQL

Databases: MongoDB, MySQL, PostgreSQL, Vector Databases (FAISS)

Cloud & DevOps: Docker, AWS, GitHub Actions (CI/CD), Linux

Tools: Git, Postman

LEADERSHIP EXPERIENCE

Lead - Cloud Community Club

Jan 2025 – Jan 2026

- Contributed to a tech community of 150+ members through workshops and bootcamps focused on Scripting, Deployment, AWS.

Vice President - Alumni Cell

Nov 2024 – Jan 2026

- Organized alumni networking events and automated LinkedIn profile discovery with scraping and automation, building a structured contact directory.

ACHIEVEMENTS

- 3× National-Level Hackathon Winner (VNR-VJ, HACK-ARENA, HACKTIVATE)
- LeetCode Top 8% Globally - 1775 rating, 550+ problems solved (SQL and algorithmic fundamentals)
